

PURION Assembly System DUAL 2

...is characterized by compact construction and convenient handling.

manufacturer	PURION [®] GmbH
type	PURION Assembly System DUAL 2
rack material	grooved Aluminium
rack dimension (L x W x D in mm)	300 x 410 x 180
clamp material	Stainless steel with EPDM Zinc (optionally) ²
Ø clamps	85-100 (4x)
Weight	3,2 Kg

The PURION Assembly System DUAL 2 enables a convenient and space saving wall fastening of UV plants of the product family PURION DUAL.

The rack is made from grooved Aluminum and is to be fixed on the wall. The reactors of the DUAL plant are fixed by the clamps.

Afterwards the control box can be easily clipped on the fastening device in front of the reactors.

The PURION Assembly System is delivered pre assembled and contains every installation equipment necessary.¹

The clamps can be made from Stainless Steel or optionally Zinc.²

Application of the PURION Assembly System DUAL 2:

PURION 2501
PURION 2501 H
PURION 2501 PVC

Advantages

- robust and convenient installation
- pre assembly
- space saving installation via fastening device for the control box

¹ Various screws and wall plugs.

² In moist or saline environments it is urgently recommended to use the configuration made from Stainless Steel to avoid inter metal corrosion.
