

PURION Assembly System SINGLE 1

...is characterized by compact construction and convenient handling.

manufacturer	PURION [®] GmbH
type	PURION Assembly System SINGLE 1
clamp material	Stainless steel with EPDM Zinc (optionally) ²
Ø clamps	42 (2 x)
wall holder for control box	4 connecting clips (ABS)

The PURION Assembly System SINGLE 1 enables a convenient and space saving wall fastening of PURION UV plants with one reactor.

The both clamps are to be fixed on the wall. The reactor is fixed on the clamps afterwards.

The control box can be easily assembled on the wall via the wall holder clips. It is not necessary to open the control box for the installation. Therefore IP protection grade and warranty claim can be maintained.

The PURION Assembly System SINGLE 1 contains every installation equipment necessary.¹

The clamps and stair bolts can be made from Stainless Steel or optionally Zinc.²

Application of the PURION Assembly System

SINGLE 1:

PURION 400	PURION 2500
PURION 500	
PURION 1000	
PURION 2000	

Advantages

- robust and convenient installation
- no opening of the control box
(maintaining IP-protection grade and warranty claim)
- cost efficiency

¹ Various screws and wall plugs.

² In moist or saline environments it is urgently recommended to use the configuration made from Stainless Steel to avoid inter metal corrosion.
